

Our family listens exclusively to XM radio because we can control what our family is exposed to. We can be spared nuisance advertising and we can block out undesirable broadcasts, unlike conventional radio. We can not imagine what why the NAB would object to us having the traffic and weather stations. We pay for the broadcasts and should be able to purchase whatever we want.

The FCC should reject the BAN's petition 04-160 to control what citizens choose to listen to.

Thank you ,
The Warnick Family
